

1. Who developed and approved the set of Impact Categories used to determine the points assigned to LEED credits?
 - A. USGBC
 - B. EPA
 - C. CEN
 - D. SMACNA

2. Which of these is a mandatory requirement for earning LEED certification?
 - A. Project has at least 5000 SF of gross floor area
 - B. At least one LEED AP with a specialty applicable to the project is on the project team
 - C. Project must achieve all prerequisites in the rating system used
 - D. Projects must use an integrated project delivery process

3. How many points are required to earn LEED Gold?
 - A. 30-39 points
 - B. 40-49 points
 - C. 50-59 points
 - D. 60-69 points

4. What are the Association Factors used to measure and scale the points assigned to each LEED credit?
 - A. Relative Efficacy, Duration, Control
 - B. Relative Efficiency, Duration, Control
 - C. Climate Change, Biodiversity, Water Resources
 - D. Social, Environmental, Economic

5. Which LEED Impact Category is given the highest weighting?
 - A. Biodiversity
 - B. Green Economy
 - C. Community
 - D. Climate Change

6. How many different market sector adaptations does LEED v4 address?
 - A. 5
 - B. 8
 - C. 21
 - D. 50

7. What central question has driven the technical development for LEED version 4?
 - A. What do we want LEED projects to accomplish?
 - B. What are the main goals of the rating systems?
 - C. What can all LEED projects do to reverse Global Climate Change?
 - D. What can LEED projects do to build a Greener Economy?

8. What are LEED's goals referred to as?
 - A. Prerequisites
 - B. Minimum Program Requirements
 - C. Impact Categories
 - D. Scorecard

9. What is the first step in the LEED certification process?
- A. Project Registration
 - B. Rating System Selection
 - C. Hire a LEED AP
 - D. Set Goals
10. How many points are required to earn LEED Silver?
- A. 40-49 points
 - B. 50-59 points
 - C. 60-79 points
 - D. 80 points and above
11. Once a project has prepared and submitted all documentation required for LEED certification what reviews does the project go through?
- A. Preliminary and Final
 - B. Design and Construction
 - C. Beginning and Ending
 - D. Pilot and Concluding
12. Which LEED certification review contains the project's final score and certification level?
- A. Preliminary
 - B. Ending
 - C. Final
 - D. Construction
13. If a team believes additional consideration is warranted after the LEED final review what can they do?
- A. Nothing, decisions are final
 - B. Petition USGBC
 - C. Hire an Attorney
 - D. Accept or appeal
14. What is the highest level of LEED Certification?
- A. Mercury
 - B. Diamond
 - C. Plutonium
 - D. Platinum
15. What are the three phases of an integrative process?
- A. Pre-Design; Schematic Design; Occupancy
 - B. Discovery; Design and Construction; Occupancy, Operations, and Performance Feedback
 - C. Design; Bid; Build
 - D. Brainstorming; Building; Close-out
16. What is an intensive, multiparty workshop that brings people from different disciplines and backgrounds together to explore, generate, and collaboratively produce design options called?
- A. Stakeholder Meeting
 - B. Small Task Group
 - C. Charrette
 - D. Team Meeting

17. For the rating system LEED BD+C: New Construction and Major Renovations what percentage of the project's gross floor area must be complete by the time of certification?
- A. 40%
 - B. 60%
 - C. 90%
 - D. 100%
18. A K-12 school is building a new library on their campus. The project team designing the building will also be responsible for selecting the new furniture. What rating system should they use?
- A. LEED BD+C: New Construction and Major Renovations
 - B. LEED BD+C: Core and Shell Development
 - C. LEED BD+C: Schools
 - D. LEED ID+C: Commercial Interiors
19. What rule provides guidance for making a decision when several rating systems appear to be appropriate for a project?
- A. 80/20
 - B. Pareto
 - C. Golden
 - D. 60/40
20. The prerequisite Integrative Project Planning and Design is required for which type of project?
- A. Hospitality
 - B. Healthcare
 - C. Retail
 - D. Homes
