CM 352 – Electrical Construction Estimating

Accubid Office Building Activity #5 – Job Report Styles

Report Styles

In order to print a Job Report in Accubid a report style must be selected. A report style determines which job components are included in the report, and controls the layout of the report, including headers, footers, margins, and page orientation. You can create as many report styles as you wish, each with its own combination of job components and report parameters.

9

Report styles are used to control which columns are included in a particular job report. You can include or exclude entire job screens. You can also control the order in which columns are printed. As part of a report style, you can also control the font used for your report, as well as headers and footers, page margins, and page orientation. Until you create your own report style, the default style is used. The default report style includes all columns from all job screens. Report styles can only be used when printing job reports.

Procedure

To create a report style, follow these steps:

- 1. With an open job, click on the Settings menu, and select the Report Styles option.
- 2. Press the Caps Lock Key to turn on CAPS.
- 3. From the Style name: drop down list select 01-default style.
- 4. Verify that all job screens are in the Report Elements tab and in the same order as shown in Fig. 1. If they are in a different order use the Move Up (or Move Down) buttons to rearrange the screens. Note: they are in the same order as they appear along the bottom of the screen in the screen tabs. Click the select all button if all screens are not selected.

- Fig. 17
- **19.** Adjust each of the column widths to "best fit" by moving the mouse near the column heading between each of the columns until a double-headed arrow mouse pointer appears and then double-clicking to fit the data to the column as shown in Fig. 17. This is important to do otherwise the printed report will not fit on one page width.
- 20. Toggle back using the same button to View Using Screen Styles and select the 01-default style.
- 21. Right click in the Extension window and select the command Group.

22. In the Quick View window under Group Options: select System and click Add to move it to the Group Order: list. Double Click Phase to move it to the Group Order: list.

Quick View		\times
Group Filter		
Group Options: Job Drawing Area Bid Item Labor Factor Sort Code 1 Sort Code 2 Sort Code 2 Sort Code 3 Sort Code 3 Sort Code 4 Sort Code 5 Sort Code 6 Sort Code 7 Sort Code 8 Unit Price Item	Group Order: System Phase <remove Remove All</remove 	Up Down
	OK Cancel	Help

23. Click OK.

24. The Extension screen is now grouped by System.

25. From the Job menu select Print Preview.

26. In the Print Preview window select the Report Style: CMGT352 Final Report and click OK.

Fig. 19

27. The Report must be in Landscape orientation, all columns fit across one page and it is grouped by System and Phase. See Fig 20. If correct, click Print.
